

EL-1500

Electric Wheel Loader

Heavy Duty Capability. Zero Emissions.

The **BATT Loader EL-1500** is engineered for heavier-duty loading tasks — taking you beyond the lifting capacity of our compact models while retaining the same intuitive control layout operators love. With a maximum lift capacity of 1500 kg, the **EL-1500** delivers serious performance for serious work.

The **EL-1500** features a hydraulic quick-hitch for fast attachment changes from the operator's seat, an enclosed air-conditioned cab for all-weather comfort, full running lights, an ergonomic right-hand hydraulic joystick, an adjustable operator seat, and a broad suite of additional premium inclusions.

Charging is simple with the supplied air-cooled charger making it easy to recharge the batteries via the 2 chargers located in the rear of the machine. Just plug into any 15 AMP power point.

Each **EL-1500** is supplied with a general-purpose bucket (with removable teeth) suitable for digging and material handling in sand, dirt, mulch, gravel and other loose bulk materials.

EL-1500 Specifications

Rated load	1500kg
Overall weight	4750kg
Bucket capacity	0.7 m ³
Max.steering angle	35°
Min. steering radius	4440mm
Amplitude of the rear axle	20°
Working time	5 hours
Charging time (approx)	8 hours
Battery type	Lead-acid maintenance free
Working speed	Low speed 6km/h High speed 16km/h
Dumping height	2570mm
Lifting height	3270mm
Overall dimension	5360mm x 1970mm x 2720mm
Dumping distance	945mm
Bucket width	1970mm
Wheel base	1975mm
Min. ground clearance	250mm
Battery model	TEV12-180
Battery type	Lead-acid maintenance free
Battery quantity	20
Battery capacity	45kw
Rated voltage	120v
Electrical voltage	12v
Hydraulic motor speed	Low 800 rpm / High 2000 rpm
System pressure	16 mpa
Drive motors	1
Tyre model	15.5/60-18
Tyre pressure	0.3 mpa
Service brake	Hydraulic disc
Parking brake	Caliper disc
