

# EL-800

## Electric Wheel Loader

## More Payload. More Power. Still Zero Emissions.

The **BATT Loader EL-800** is built for medium duty and heavier tasks — combining a larger format chassis with a substantial 800kg maximum lift capacity. It is powerful, capable, and still extremely easy to manoeuvre, with a tight 2.2 metre turning radius for confident work in restricted access locations.

The **EL-800** comes standard with a quick-hitch for fast attachment swaps without stepping out of the cab, full running lights, an ergonomic right-hand hydraulic joystick, an adjustable operator seat, plus a suite of additional operator-focused inclusions.

Twin electric drive motors — one on each axle — provide true AWD, and a third independent electric motor drives the hydraulic system for smooth, consistent power delivery.

Charging is simple with the included air-cooled charger, which can be wall-mounted in the workshop or suitable area and plugged into a 15 AMP power point.

Each **EL-800** is supplied with a general-purpose bucket for handling sand, dirt, mulch, gravel and other loose bulk materials.

# EL-800 Specifications

Rated load	800kg
Overall weight	2200kg
Bucket capacity	0.25 m <sup>3</sup>
Max steering angle	45°
Min. steering radius	2050mm
Amplitude of the rear axle	19°
Charging time (approx)	8 hours
Battery type	Lead-acid maintenance free
Working time	6 hours
Working speed	Low speed 10km/h High speed 20km/h
Dumping height	2170mm
Lifting height	3330mm
Overall dimension	3810mm x 1260mm x 2270mm
Dumping distance	405mm
Bucket width	1130mm
Wheel base	1380mm
Wheel thread	945mm
Min. ground clearance	200mm
Battery model	3-EVF-200
Battery type	Lead-acid maintenance free
Battery quantity	12
Battery capacity	14.4kw
Rated voltage	72v
Walking system voltage	72v
Walking system power	5kw x 2
Motor quantity	2
Tyre model	26 x 12.00-12
Working brake	Drum oil brake
Parking brake	Drum handbrake

# Available Attachments

General Purpose Bucket
